## How to Check for COVID-19 Symptoms at Home Each Day Before Sending a Child to School

### Astro Asks You to Remember

If a child must be dropped off late or picked up early, you must call the school secretary in advance. Access to the building will not be allowed without prior arrangements. Call (330) 339-3577.

Visitors are discouraged from entering Starlight School. If it is absolutely necessary to enter the building, visitors will be subject to the same temperature and symptom screening that is performed for students and staff prior to entry and must wear a mask.

Non-essential items from home will not be permitted in the building. These include, but are not limited to pillows, blankets, stuffed animals, dolls, video games, movies, books, etc.

If your child or someone in your home has COVID-19 symptoms, keep your child home and call Starlight School. Parents / guardians must check their child for symptoms every morning.

If your child has a temperature of 100°F or 37.77°C (or greater), keep them home and call Starlight School. Parents / guardians must check their child's temperature every morning.

Please understand Starlight School will be conducting daily symptom and temperature checks as students enter the school building.

If any child arrives with symptoms or a fever of 100°F or 37.77°C (or greater), they will be sent home.

We encourage you to have your child tested for COVID-19 if they have symptoms.

If your child has a temperature of 100°F or 37.77°C (or greater), symptoms, or a positive COVID-19 test, please contact Starlight School for details on when your child is permitted to return to school.

For additional information on any item in this document, please refer to the appendix in the Starlight School handbook. The handbook, other school information, COVID-19 school information, and cancellations can be found at [www.tuscbdd.org](http://www.tuscbdd.org).

### COVID-19 SYMPTOM CHECKER → KNOW THE SIGNS → BE PRACTICAL

Fever of 100°F or 37.77°C (or greater) or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea. Remember to think of symptoms in a practical manner. Ask yourself if the symptoms are new or unusual for

the person. For example, a person who has irritable bowel syndrome and usually has diarrhea would not consider diarrhea as a COVID-19 symptom unless the diarrhea was unusually worse. **If you are unsure or have any questions, please call us at (330) 339-3577.**
